

TALPA COCKPIT

Full visibility and predictive insights
for fleet uptime performance

TALPA's end-to-end solution is built on the 3Cs framework.
Each unlocks the complete data-to-action cycle.

CORTEX

Collects and standardizes machine data into one reliable source of truth.

COCKPIT

Visualizes fleet health and performance for smarter service decisions.

COPILOT

Makes analytics actionable, improving service efficiency and creating new revenue streams.

What is TALPA COCKPIT?

COCKPIT is TALPA's dashboard. It transforms field machine data into clear, visual insights that show usage, performance, and service needs in near-real time. This helps OEMs monitor machine behavior, plan services proactively, and strengthen customer trust.

Scan and start *Operating Smarter* now.

The Problems We Solve

01

Limited visibility into near-real-time machine performance.

02

Difficult to identify issues before they impact customers.

03

Lack of timely insights slows product and service improvements.

What You Gain with COCKPIT

Gain near-real-time visibility of machine health and usage.

Detect emerging issues early and reduce service delays.

Improve decision-making and trust through transparent insights.

Packages

FEATURES	What You Get	What's Included
Signal Explorer	Clear visibility into current and historical machine data	Near-real-time data access for all connected machines
Custom Dashboards	Fleet metrics and machine health at a glance	Configurable KPIs and visual analytics for fast decisions
Event Monitoring	Overview of performance-impacting events	Logs and alerts for warnings, downtime, and abnormal conditions

The Power of TALPA Complete

While each of TALPA's solutions delivers value on its own, the full 3Cs framework, CORTEX, COCKPIT, and COPILOT, unlocks the complete data-to-action cycle.

Together, they help OEMs cut warranty costs, strengthen dealer performance, and deliver more reliable service to customers.
